OUR PRODUCTS

Whole House Water Filtration

With installation

Our whole house filtration units filters all incoming water at the main supply point, ensuring clean water for showers, sinks, appliances, and outdoor taps. Perfect for families and properties.

Ideal for complete home protection.

Under-Sink Filters (3+3 stages)

With installation

Need Premium Quality water right at the faucet? Our under-sink and drinking water filtration system deliver crystal-clear potable water

Perfect for kitchens and focused filtration needs.

Whole House + Under Sink Filtration System

With installation

A complete two-level water filtration that treats water at the entry point of your home and again at the kitchen tap for drinking.

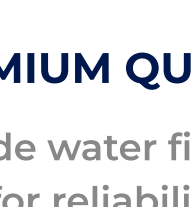

One system for the whole home. One tap for pure drinking water

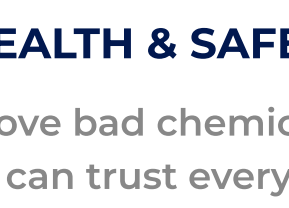

WHY CHOOSE US

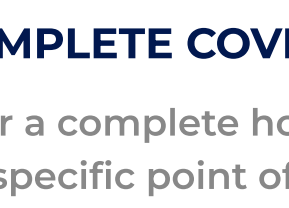

We transform your water at the source, ensuring total confidence in every drop from the kitchen sink to the shower.

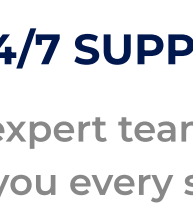

PREMIUM QUALITY
Top-grade water filters built for reliability

HEALTH & SAFETY
Remove bad chemicals, so you can trust every drop

COMPLETE COVERAGE
For a complete home or specific point of use

24/7 SUPPORT
Our expert team is with you every step

PLUMBING
Less dependent on disposable products.

PLUMBING
Prevents Scale Build-Up in pipes which helps reduce Maintenance & Repairs

HEALTH
Effective filtration removes or reduces VOCs, PFAS, chlorine, heavy metals and other harmful chemicals. It promotes immunity and is safer.

BEAUTY
Filtered water is free from impurities & helps in clearer, healthier skin. Maintains natural glow and helps reduce acne.

WATER INSIGHTS

PFAS (The Invisible Forever Chemicals)

PFAS are industrial chemicals that persist in water and the human body.

Water Accessibility

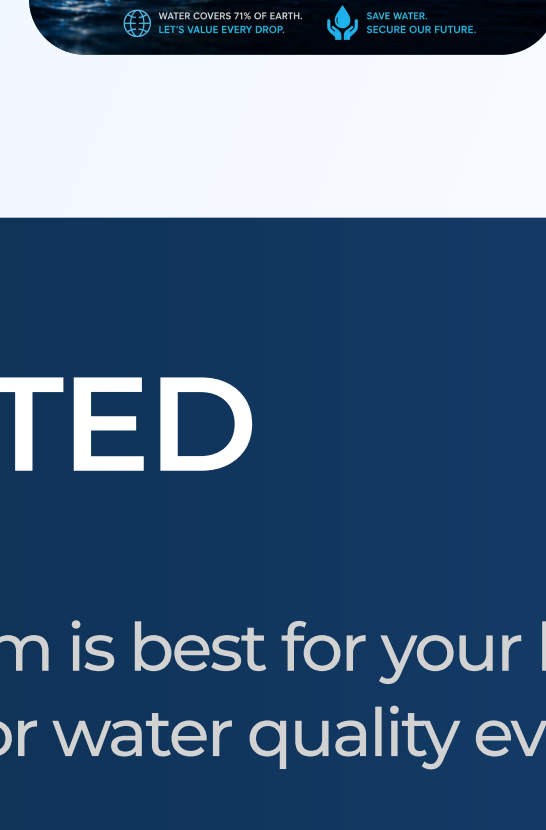

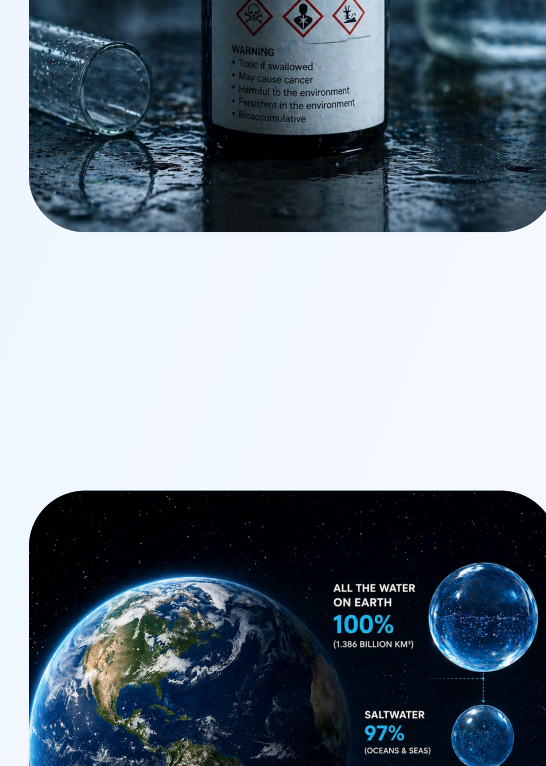

Only ~1% of Earth's water is available as freshwater for humans and by the time it reaches your home, it may carry impurities.

Chlorine in Water

Chlorine makes water safe to supply, but removing the excess at home makes water more comfortable to use and better to drink.

Harmful Chemicals

Uranium and radium in drinking water are naturally occurring radioactive elements & over long-term consumption, may harm the kidneys & bones.

Testimonials

Outstanding service

The whole house filter improved our showers and bathrooms, and the under-sink unit gives us great-tasting drinking water. It's the perfect combination.

Jo

Amazing product

My skin used to feel dry after every shower. Now it feels softer, and even soaps lather better.

Jyoti

Worth it

The installation was simple, and the impact on plumbing and fixtures is clearly visible. Worth the investment.

Akbar

Trustworthy

It's one of those upgrades you don't think about initially, but once installed, you wonder how you managed without it.

Kirandeep

Frequently asked question

Still have a question?

Raise a Question

Is the water safe to drink after whole house filtration? ^

It's cleaner enough for daily household use. However, you can double the purity of water with an additional under-sink RO/UF.

How often should filters be changed? v

Is this only for drinking water? v

CLEAN. SAFE. REFRESHING. THAT'S THE AQUALYTICA® PROMISE.

AQUALYTICA
Precision in every Drop

We Are Committed To Delivering Consistent Quality And Performance. Utilising Our Latest Cutting Edge Technology. Ensuring Our Customers Can Rely On Us Every Single Day.
